

# SoundScope MR DIN and Nuvo

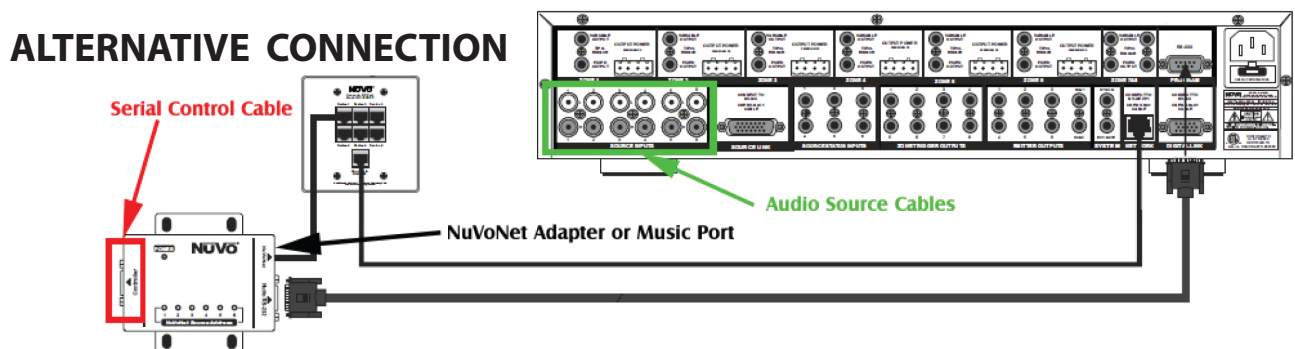

Any compactable NuVo multiroom controller (Grand Concerto shown)

- NuVo requires either a NuVoNet adapter or a Music Port configured as a NuVoNet adapter for best operation with SoundScope.
- CasaTunes controls the NuVo controller and supplies Metadata to NuVo keypads.

- Green cables are audio cables with 3.5mm plugs on PC end and RCA plugs on controller end:

If PC does not have built-in serial port, plug a USB to serial adapter into a USB connector on the PC. Plug one end of a serial cable into the adapter and the other end into the adapter.

**Nuvo controller (Grand Concerto shown) with NuVoNet/Music Port Adapter**
